SKILLS

CORE

HTML5 · CSS3 · JavaScript

FRAMEWORKS

React · Tailwind CSS

MOTION

Framer Motion · GSAP · Lenis

TOOLS

Git · Vite · Vercel · VS Code

FOCUS AREAS

Responsive Design · UI Implementation Perf. Optimisation · Landing Pages Component Architecture

VENTURE

Tirenify

Founder · 2024–Present

Privacy awareness platform that checks whether your email appeared in known data breaches. Built and shipped as a solo founder.

tirenify.netlify.app

EDUCATION

B.Eng. Industrial Engineering

Federal University of Technology Akure (FUTA)

Expected: 2029

Applying engineering systems thinking to product development and technology ventures.

SUMMARY

Frontend developer and product builder with 3+ years shipping web products using React and modern JavaScript. Currently studying Industrial Engineering at FUTA while building Tirenify as a solo founder — combining engineering systems thinking with frontend execution. Able to move from concept to deployed, production-ready product independently. Seeking frontend, freelance, and early-stage startup roles.

PROJECTS

Tirenify — Digital Privacy Platform

tirenify.netlify.app · Founder · React · JavaScript · 2024–Present

- Built and launched a live privacy platform that checks emails against known breach databases.
- Sole designer, engineer, and product owner — concept to MVP.
- Evolving toward a broader digital trust and identity platform.

BizDash — Analytics Dashboard

bizdash-pi.vercel.app · React · JavaScript · Chart.js

- Multi-period dashboard: sales, customer growth, and review analytics with dynamic charts.
- Demonstrates ability to translate business data into actionable visual interfaces.

Upwork Showcase — Lead Platform

upwork-showcase.vercel.app · React · HTML · CSS

- Conversion-optimised portfolio platform built to attract and close Upwork freelance clients.

Mini E-Commerce Storefront

miniecom-pi.vercel.app · React · JavaScript · CSS

- Full e-commerce frontend: product filtering, cart state, checkout UX, newsletter capture.

Business Landing Page Demo

business-landing-demo.vercel.app · HTML · CSS · JavaScript

- High-conversion landing page with animated testimonials, case study filter, dark/light mode.

Personal Portfolio

dan-lac.vercel.app · React · Framer Motion · Tailwind · GSAP · Lenis

- Premium dark-mode portfolio: cinematic loading, parallax, word animation, magnetic CTA.

EXPERIENCE

Founder & Lead Developer — Tirenify

Self-directed · 2024–Present

- Built a live privacy-awareness platform from scratch as a solo founder.
- Manages product roadmap, frontend architecture, and iterative releases.

Freelance Frontend Developer

Independent · 2022–Present

- Designs and builds React-based web products — dashboards, landing pages, e-commerce frontends.
- Independently scopes, estimates, and delivers projects end-to-end.
- Focused on performance, responsiveness, and measurable business outcomes.
